

## FORMICIDAE: CATALOGUE REFERENCES

[Note: names of authors are presented in alphabetical order. Publications of each author are in chronological order, and the publication dates of older papers (usually pre-2000) are given in square brackets following each entry. The month of publication is indicated by a roman numeral. Hence, [31.vii.1991] indicates 31 July 1991. An entry such as [(30).vi.1990.] indicates that only the month of publication was issued, so the final day of the month is assumed as the date, and appears in parentheses. In publications where only the year is known, the publication date is assumed to be the last day of the year, for example [(31.xii).1761.]

- Abe, M. & Smith, D.R. 1991. The genus-group names of Symphyta and their type species. *Esakia* **31**: 1-115. [31.vii.1991.]

- Andrade, M.L.de: see under De Andrade, M.L.
- André, E.  
[Note: entries under André, E. include the works of two brothers, André, E. (1838-1914) and André, J.E.E. (1844-1891). Both had the name Ernest, and both used the initial in their publications, rendering correct authorship confusing in some cases. To obviate this they are catalogued here artificially, as if a single person; the correct author is given in parentheses for each publication.]
- André, E. (Ernest) 1874. Description des fourmis d'Europe pour servir à l'étude des insectes myrmécophiles. *Revue et Magasin de Zoologie* (3) **2**: 152-235. [Pp. 152-160 published (31).v.1874; pp. 161-192 published (30).vi.1874; pp. 193-224 published (31).vii.1874; pp. 225-235 published (31).viii.1874.]

- [Note: apparently new synonyms in the synonymic lists within this publication are ignored as they are arbitrarily designated, not based on objective study. Borowiec, 2014: 2, stated that, "All infraspecific names, including subspecies names, are treated as synonyms although in future studies many of them can be raised to species level." This approach is no improvement over leaving each currently available infraspecific name as a subspecies until proved otherwise by analysis. Previously established junior synonyms remain unchanged. Also, in the Borowiec catalogue infrasubspecific (unavailable) names and *nomina nuda* are regarded as 'synonyms', but new changes of status are not indicated.]
