[Note: Heer (1849, 1850) frequently appended the words Radobojana or Oeningensis to binominals, often to several separate species in a single genus, for example his *Formica obesa*, *F. pinguis*, *F. pinguicula*, *F. macrocephala*. The locality names do not constitute part of the taxon name, but rather indicate the geographical provenance of the material, either Radoboj (Croatia), or Oeningen (Germany). Thus *F. obesa* Radobojana indicates his material of this species from Radoboj, while *F. obesa* Oeningensis refers to his material of the same species from Oeningen.]
